1 Release Notes

1.1 Purpose

The Schneider Electric Serial ASCII SmartDriver V1.5.2 Release Notes includes information about the new release. This version includes fixes as described in the Revision History.

1.2 Revision history

Revision	Date	Comment
1.4	2020-09-14	Fix applied to handle message length longer than 128 bytes for certain configurations and messages. It was found that a certain message length or message content could cause ASCII SmartDriver to corrupt message data.
1.5.2	2020-10-29	Recompiled source causing possible issues of data corruption of serial data output on AS-P servers.
1.6.0	2020-12-21	New Library source added. Function calls streamlined.
