  - 4.1 Version 2.0.0.0 ..... 4

## 2 Introduction

The OpenWeather extension is a middleware application the sits inside SmartConnector and establishes a link between the extension and the OpenWeather API. The required weather locations are passed to the SmartConnector Extension via the SmartConnector portal configuration. The SmartConnector then serves out EWS points to represent these geo-graphical areas.

### 2.1 Change History

Revision	Date	Author	Description/Change
A	01 December 2020	P Rawlingson	Document Creation
