Indigo Vision Alarms
SmartConnector Extension

Introduction

This Smart Connector extensions allows EcoStruxure Building Operation and Continuum to send alarm data to an Indigo Vision system.

Features and Benefits

The Indigo Vision Alarms Services enables 3rd party applications to register events, which can trigger actions on the Indigo Vision system. This integration enables alarms sourced in EWS and Continuum systems to be parsed and presented, to the Indigo Vision system via the Indigo Vision Binding Kit. This can be used to create cause and effect scenarios, where BMS and its associated integrated systems can send events to the Indigo Vision system to trigger camera positioning, film recording, scenarios and video layouts, and more. No information will be sent for the Indigo Vision VMS back to Schneider BMS. This is a single direction data integration from Schneider BMS into Indigo Vision VMS only.

Alarm Configuration

Alarms from EcoStruxure Building Operation and Continuum can be configured to send events to the Indigo Vision service. The alarms which trigger the service can be configured by priority.

Supported Operating Systems

The following is a list of Operating Systems which the SmartConnector framework has been tested against. Non-listed operating systems capable of running .NET 4.5 should also work but their compatibility has not been verified.

- Windows 7 64 bit.
- Windows 10 64 bit.
- Windows Server 2008 64 bit.
- Windows Server 2012 64 bit.
- Windows Server 2016 64 bit.

Supported Database Servers

The following is a list of Microsoft SQL Servers which SmartConnector has been tested against. Non-listed servers compliant with Microsoft SQL Server may also work but their compatibility is not guaranteed.

- Local DB.
- Microsoft SQL Server 2012 Express.
- Microsoft SQL Server 2012.
- Microsoft SQL Server 2014 Express.
- Microsoft SQL Server 2014.
- Microsoft SQL Server 2016 Express.
- Microsoft SQL Server 2016.
